

PROPOSED MARINE FACILITY DEVELOPMENT AT BURTON FERRY

Pembroke Marine Group (PMG) is seeking planning permission for a marine facility development sited at the NATO Jetty at Burton Ferry.

The proposed design for the facility aims to integrate sympathetically with its surroundings while minimising any environmental impact. It is hoped that the marine facility will help to increase visitor numbers to the Haven, while also providing jobs and opportunities for local businesses. PMG are also seeking to bring further investment to the local area through its application for European Funding for the proposed development.

A public exhibition outlining the proposed development will be held at the Bridge Suite, Cleddau Bridge Hotel on Wednesday 10th March 2010 between 10am and 8pm. Two of the directors of PMG will be available to discuss the proposed development. PMG welcome all to the exhibition and looks forward to receiving comments and feedback on the proposals and how we can maximise benefit for the local community.
